

Blackwell LoadMaster

December 2013

Welcome to this edition of our BLL newsletter, with Christmas now fast approaching the Loadmaster team are in full production with Ute Decks and trying to satisfy all our customers with the pre Christmas rush of towbar fitting.

New releases/recent projects:

Ranger with full toolbox, front & rear ladder rack

New model Hyundai Sante Fe removable towbar.

Galvanised deck with alloy sides & alloy floor

Staff Profile

Wayne Williams

Wayne is a very skilled engineer and has been part of the Blackwell team for over 20 years. His main focus is the manufacture and fitting of cargo barriers, bullbars, special build towbars and general towbar fitting. In his spare time Wayne likes to play a few rounds of golf, and socialise.

New Deck Assembly Facility:

With the increased level of deck production over the last year, we have built a new 3 bay shed that now accommodates the assembly of decks as well as housing timber, mudguards, and other components.

We would like to invite you to take a good look around our website, and familiarise yourselves with our online order form for towbars.

This form is a fast and effective way to complete your order.

We also wish to take this opportunity to advise you that we now have an extensive range of photos in the gallery of some of our latest projects. These will now be updated on a regular basis as new projects are completed.

We would like to advise you of our closure over the Christmas period. Our last day of business for 2013 is the 24th December, and we will be re-opening on the 6th January 2014.

The last day for Easy-Fit towbar orders for the North Island is the 13th December 2013 and the 19th December 2013 for South Island customers.

Lastly we wish everyone a Merry Christmas and a prosperous New Year.
